

10 LANE EVOLUTION

Weighing and Filling Machine for Cherries

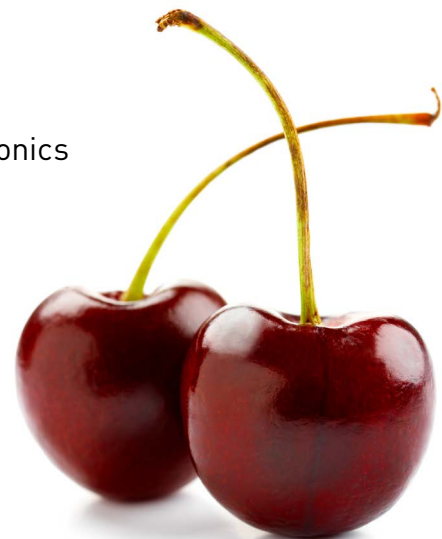

The Cherry Evolution is just that, the “Evolution” of an industry with equipment that is specifically designed to handle cherries more gently and accurately while having the versatility to pack into both clamshells and into bags. The Cherry Evolution is able to pack up to 100 clamshells a minute which means more throughput and less labor which can add up to a big cost savings.

Bagger attachment

FEATURES AND BENEFITS
